

## About Exelon Corporation

Exelon is a Fortune 100 energy company with the largest number of utility customers, one of the cleanest, lowest-cost power generation fleets and largest retail customer bases in the U.S. The Exelon family of companies participates in nearly every stage of the energy business, from generation and power sales to transmission and delivery. Headquartered in Chicago, the company does business in 48 states, the District of Columbia and Canada. Exelon had 2017 revenue of \$33.5 billion and trades under the ticker symbol EXC.

### Energy Delivery

Exelon's six utilities deliver electricity and natural gas to approximately 10 million customers in Delaware, the District of Columbia, Illinois, Maryland, New Jersey and Pennsylvania through its Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and Pepco subsidiaries.

### Energy Generation

Exelon Generation is one of the largest competitive power generators in the nation, with owned generating assets totaling more than 35,168 megawatts. Exelon is the largest owner and operator of nuclear plants in the United States and is the largest producer of emissions-free energy.

### Competitive Energy Sales

Constellation is Exelon's competitive retail and wholesale energy business. Constellation and its companies provide an array of innovative energy products and services to customers across the United States and in Canada. Headquartered in Baltimore, Constellation serves approximately 2 million residential, public sector and business customers, including more than two-thirds of the Fortune 100.

## By the Numbers (2016)

- Operating Revenues ..... \$33.5 billion
- Employees ..... Approximately 34,600
- Owned U.S. Generating Capacity ..... More than 35,168 megawatts
- Service Territory ..... 25,590 square miles
- Electric Transmission ..... 11,472 miles

## How Exelon Ranks

- Exelon has been the top-ranked electric and gas utility on the FORTUNE 500 each year since 2008.
- Exelon ranked among the top five U.S. utility companies in Newsweek's 2017 Green Rankings.
- Exelon was named to the Dow Jones Sustainability North America Index for the 12th year in a row in 2017.
- Exelon had the lowest rate of emissions among the 20 largest public or privately held energy producers in 2017.

## Driving Competition and Customer Choice

As the nation's largest competitive energy provider, Exelon maintains a strategic presence in key competitive markets and believes that competition drives choice, innovation and savings for businesses and residential customers alike. The company champions competitive power markets as the best framework for meeting important economic and environmental policy objectives, including ensuring the nation's shift to a cleaner energy supply in the most cost-effective manner.

## Advancing Clean Energy

Exelon believes that clean, affordable energy is the key to a brighter, more sustainable future. It has one of the nation's cleanest and lowest-cost power generation portfolios, with 62 percent nuclear, 20 percent natural gas and approximately 9 percent hydro, wind, solar and other clean generation. In addition, Constellation provides customers with clean energy solutions including natural gas supply, solar energy solutions, energy efficiency services and real-time energy management.

Exelon has long supported efforts to reduce carbon and other forms of air pollution from the power sector. The company is the largest producer of zero-carbon energy, accounting for one ninth of all emissions-free energy produced in the U.S.
