

Power Costs, Inc.

For more than 25-years, Power Costs, Inc. (PCI) has been the premier provider of essential software solutions to both domestic and international energy marketing, supply and trading firms. Our team of subject matter experts provide market participants (and non-participants) with an array of solutions to capitalize on opportunities, maximize portfolio capabilities and increase profits.

- **PCI is deployed in all North American markets**
- **PCI optimizes 60% of the generation in the U.S. and 80% in Mexico**

PCI's Platform addresses the varying needs of small to large firms for event-free, efficient, profitable participation in Northeast markets (PJM, ISONE, NYISO, IESO). Our platform capabilities include:

- Asset & Portfolio Optimization
- Front & Back Office: ISO Bidding/Settlements
- Scheduling & eTagging
- ETRM
- Energy Accounting & MDM
- Asset Operations & Outage Management
- Gas Management
- Transmission Operations & Billing
- Post-Analytics & KPIs
- Reporting & Business Intelligence (BI)
- System Integration & Automation
- Secured Cloud Hosting

PCI customers utilize our value-added solutions to deliver measurable results and high ROI.
